

I am writing to ask you to please not alter or change Indiana's no call privacy law. I feel this law has given me a chance to actually relax at home without the interruptions of often rude, high pressure sales calls. I see no reason the federal government has to change something that has a positive impact on so many people. If you are thinking of implementing a federal law please use Indiana's as your template and do not settle for standards any less than the state of Indiana has implemented.

Thank You,

David Loutzenhiser
